Kristopher Chesney

Technology Leader | Systems, Data, and Applied AI

O'Fallon, MO | kris.r.chesney@gmail.com | krisrchesney.github.io/resume.html

SUMMARY

Technology leader with 20+ years across data science, security analytics, IT operations and systems administration. Leads teams and delivers work across the stack, from infrastructure and identity to data and analytics. Proficient at building code and developing workflows using AI tools. Excels at setting and executing strategy.

IMPACT HIGHLIGHTS

- Saved **$200K** in one fiscal year: about $150K from moving Customer Support from a vendor to an in-house team, $38K from software consolidation, and $15K from smaller projects. Larger savings are projected each year after.
- Built a Claude-based support ticket triage tool, integrated with HubSpot, that cut resolution time by **25%**. Claude's analysis of historic tickets shaped HubSpot workflows and spam filtering that cut incoming volume **30%**.
- Finished a full Microsoft 365 audit and remediation plan in a few days instead of a few weeks, using Claude.
- Restructured the IT service department and workflow to allow for IT staff reduction by **50%** while response times reduced, backlog shrunk, and client satisfaction was maintained for roughly 200 staff.
- Built a NetSuite migration tool that cut file mapping and validation time by **85%** with increased accuracy.
- At Proficio, an A/B test of AI that automatically researches security alerts showed a **24%** drop in analyst investigation time, and a data cleaning strategy reduced log volume by **26%**.

EXPERIENCE

Augustine Institute, Florissant, MO Apr 2025 – Oct 2026

Sr. Manager, Enterprise Technology | Manager, Technology Services | Data Engineer

- Led a team of four (program manager, data scientist, systems administrator, IT lead). Designed a single sign-on (SSO) plan across Entra and other platforms that met cyber insurance requirements without overloading users with MFA prompts.
- Planned and carried out the Customer Support move to an in-house team, with a HubSpot support platform built on Zoom Phone, intake forms, and about 20 routing workflows.
- Used Claude to build a support ticket triage tool, an employee onboarding tool for Active Directory and Entra, and a task board that pulls work from email, chat, and Jira. Rebuilt Active Directory to match the org structure.
- Other major work included: audited event planning platforms (Oracle Opera, Delphi, iHotelier), deployed Jira for the tech help desk, managed domains in Hover and DNS in AWS, and refreshed websites in Webflow, prototyping redesigns with Claude.
- As Data Engineer, built dashboards and ETL in Domo, with Twilio Segment, PostgreSQL, and Athena for the data lake.

Proficio, Inc., Carlsbad, CA (Remote) 2018 – 2024

Data Science Manager | Strategic Data Scientist | Use Case Architect | Cybersecurity Analyst

- Led data science for the machine learning behind a managed security service that monitors many clients at once. Owned the models and alerts in Elastic that flagged attacks across client environments.
- Lowered cost by cutting ingested log volume 26% with a data cleaning strategy. Built cross-team reporting in Power BI. Patent pending on the platform's multi-client ML architecture.

SELECTED PROJECT

Payments Ops Analyst (personal project, simulated data). Directed Claude Code to build the pipeline, then designed a formal test of an AI agent that investigates payment incidents. 8 of 12 runs passed. krisrchesney.github.io/payments-ops-analyst

EARLIER EXPERIENCE

TechMD. Systems Analyst II. Assessed client IT needs and delivered solutions. 2014 – 2015

TheCloudLounge, NZ. Technical Consultant. Managed the support and implementation teams. 2013 – 2014

Pacific Marine Credit Union. Systems Administrator. Ran servers, backups, and Windows support. 2007 – 2013

USMC Reserves. Led 6 to 8 Marines on computer and network maintenance. Secret clearance (not current). 2005 – 2011

EDUCATION

M.S. Data Analytics, Western Governors University

B.S. Computer Science, minor in Business, California State University San Marcos

A.S. Computer Networks, Coleman College

SKILLS

Leadership: technology strategy, vendor management, team leadership, service desk, platform audits, Agile (Scrum, Jira)

Platforms: Microsoft 365, Entra, Active Directory, SSO, PowerShell, HubSpot, Jira, NetSuite, Webflow, AWS

Data and AI: Domo, SQL, Python, PostgreSQL, Athena, AI workflow design (Claude)
